Category

All

- Insights**
- Technology leads in both revenue(\$0.84M) and profit(\$145k)
 - Furniture has strong sales(\$0.74M) low profit(\$18K) due to heavy discounts
 - highest discounts on tables (24%) and Bookcases(21%) are the main problem

- Recommendation**
- Reduce discount on tables and bookcases
 - push more technology products
 - Aim to lift overall margin above 12.5%

Top-5 product by Revenue

bottom-5 product by profit

Sub-Category

All

Insights

- Top-5 products (Canon, Fellowes, Cisco, HON, HP) drive most revenue; #1 alone = \$62K.
- 299 of 1.85K products are loss-making products (16%). Bottom-5 show very low/negative profit.
- Sales $\neq$ Profit: most products sit in low-sales/low-profit zone on the scatter plot.

Recommendations

- Protect & promote Top-5 with better stock & bundles.
- Review/raise prices or discontinue loss-makers; cut loss-making SKUs by 30%+.
- Fix weak Sales-Profit link via margin rules & less discounting.

Revenue Performance by Regions

Profitability by Regions

Insights

- West is the top performer (highest revenue \$0.73M and profit \$108K).
- East is strong and close behind.
- Central has decent revenue but the lowest profit (\$40K) because Furniture is losing money (-\$3K). Technology is the only strong category there.
- South has the lowest revenue but better profit than Central.

Central Region Profitability by Category

Recommendations

- Fix Furniture losses in Central (review discounts/costs or reduce low-margin items).
- Push more Technology sales in Central — it's already profitable.
- Study what West is doing well and apply the same strategies to Central and South.
- Grow South carefully to increase revenue without hurting its better margins.

Revenue Performance by Segments

Profitability by Segments

Insights

- Consumer drives the most revenue (\$1.2M) and profit (\$134K), but has the lowest margin (11.5%).
- Corporate is solid in both revenue and profit with a good 13% margin.
- Home Office has the lowest revenue and profit, yet the highest margin (14%) — it is the most efficient segment.

Profit Margin by Segments

Recommendations

- Improve Consumer margins (review discounts or product mix) since it is the biggest segment.
- Grow Home Office carefully — high margin means every extra sale is more profitable.
- Maintain Corporate strategy; it balances volume and healthy margins well.

Profit performance Across sub Categories

Average Discount Across sub Categories

Insights

- Copiers and Phones deliver the highest profits with relatively low discounts.
- Tables, Binders, and Bookcases have the highest average discounts (0.26–0.37) and much weaker (or low) profits.
- The scatter plot shows that higher discounts generally lead to lower profits — heavy discounting is hurting overall profitability.
- Overall average discount is 16%.

Impact of Discounting on Profit

Recommendations

- Reduce discounts on Tables, Binders, and Bookcases to protect margins.
- Focus promotions on high-profit, low-discount items like Appliances and Phones.
- Set a discount limit (e.g., max 20%) for low-margin sub-categories to avoid losses.

Annual Revenue Trend

Annual Profit Trend

Insights

Profit growth (48%) almost matches sales growth (47%). Revenue recovered after a small dip in 2015 and kept rising to \$0.73M in 2017. Profit climbed much faster — from \$50K to \$93K — showing the business is becoming more efficient and margins are improving.

Recommendations

- Dig into what caused the big profit jump in 2016–2017 (better product mix, lower costs, or smarter discounts) and scale those actions.
- Check why revenue dipped slightly in 2015 so it doesn't happen again.
- Focus extra attention on the highest-margin products and regions to keep the strong profit trend going.
